

On Demand Learning

Learning Management System & LMS Administrative Services

Moser Learning can update and service your current Learning Management System (LMS) or your company can leverage Moser's LMS platform, customized to meet your company's needs and goals.

Whether training new business executives on your standards and procedures or ensuring your customer service representatives have the up-to-the-minute information for them to succeed, corporate learning and development is a key part of any corporation's success.

LMS ADMINISTRATIVE SERVICES

We offer a variety of LMS services to help clients integrate HRLearn seamlessly into their organizations and their daily professional routines. Our LMS administrators have over 20 years of combined experience managing LMS software, integrating third-party tools and implementing custom configurations to fit the needs of any client. Our services include, but are not limited to:

Analyze your training needs and goals; and create your LMS start-up plan.

Configure your LMS portal for your specific needs and goals.

Provide on-going application support.

We also offer access to Moser's training library containing hundreds of ready-to-go skills training.

MOSER LEARNING & DEVELOPMENT IS PROUD TO OFFER AN LMS PLATFORM

Moser Learning also offers a Learning Management System platform which allows organizations the opportunity to provide their users training anytime and anywhere.

Enable your employees with the skills needed for them to thrive in the workplace and continue to empower staff with ongoing learning and development in this one-stop-shop customized for your organization. The LMS and Moser's L&D team make it easy by automating enrollments so new hires have the tools and knowledge to get started and continue to play an important role in your employee's success by engaging them in the latest and greatest knowledge available to understand your brand, products, services and more.

With the LMS, you can develop and produce training specific to your business's needs and goal, create and manage certifications, as well as compliance content and track compliance requirements.
